GitHub ·LinkedIn

PROFILE

Software engineer who designs and ships real-world applications across web and backend systems. Skilled in Go, JavaScript, React and Laravel, with experience in startup-paced environments and client-facing projects. Interested in building efficient systems and continuously improving how software is made.

EXPERIENCE

Jun 2026 - present
Software Engineer · Tanami

Feb 2025 - Jan 2026
Full-stack Developer · Croozz Technologies
Part-time in a small, fast-moving team shipping frequent updates.

Nov 2025 - Dec 2025
Full Stack Engineer · Babel Pastries
Built a TV slideshow application with an admin panel and engine, deployed it, and trained a new developer on Laravel and React.

Oct 2025 - Nov 2025
Junior Software Engineer · Tech Bay IT Solutions
Trained on Dynamics 365 and internal systems, and worked with clients, many of them government-related.

Jun 2025 - Jul 2025
Software Engineer Intern · DOO Mena
Built a backend system for one section and started work on their frontend.

EDUCATION

Aug 2024 - Aug 2026
DevOps · Reboot Coding Institute
Graduated.

Sep 2021 - Aug 2026

Bachelor's in Software Engineering · University of Bahrain
Graduated.

PROJECTS

Nocturne · React (Vite) + Go
Served as the bridge between frontend and backend development, coordinating integration and keeping functionality and code quality consistent across the project.

Overworld · React Native
Built a mobile app that automatically plays user-selected music when connecting to specific WiFi networks or Bluetooth devices.

go-byte · Go (SDL2)
Built a CHIP-8 emulator in Go using SDL2 for graphics and input handling.

S.M.O.B.B. · Rust
A text adventure about AI, released with a terminal and web version.
